

Trend Micro™

MAXIMUM SECURITY 10

Shop, Bank, Browse and Share Online Safely
Comprehensive Multi-Device Protection for You and Your Family

Maximum Security 10 provides protection against viruses, cybercriminals, identity theft, ransomware and other online threats. Maximum Security provides advanced protection for your PC, Mac, Android & iOS devices, so you can shop, bank, browse and share online safely.

It's unique security, providing privacy protection on social networks such as Facebook, Google+, Twitter and LinkedIn. Utilising the parental controls, you can restrict or filter your kids' website access, protecting them from accessing inappropriate websites. Featuring an online password management tool, Maximum Security provides an all-in-one security solution for practically everything you do online.

KEY BENEFITS

Blocks Dangerous Websites

Protects against viruses, ransomware and spyware by identifying dangerous links in websites, social networks, emails and instant messages

Protects your Privacy on Social Networks

Identifies Facebook, Twitter, Google+ and LinkedIn privacy settings that may leave your personal information publicly available and vulnerable to identity theft

Manages Login IDs & Passwords

Generates and saves unique passwords for your login IDs, so you can easily sign in to websites without having to remember multiple passwords

Secure Online Banking

Verifies SSL certificate authenticity, protecting your financial information from unsecure banking and shopping sites

Guards against Identity Theft

Detects spam emails containing phishing scams that can trick you into revealing private personal information to cybercriminals

Optimises System Performance

Scans your computer to recover disk space, restoring your PC to optimum performance your contacts from one device to another

Protects Kids Online

Enables you to restrict or filter online access for kids, preventing them from accessing inappropriate websites

WHY IT'S BETTER

With expertise gained over 26 years, Trend Micro is a security software leader that delivers:

- The fastest protection against new web threats*
- Top rated protection, blocking sites trying to trick you into downloading malware*
- Unique cloud-based protection, safeguarding our customers from over 250 million threats per day
